Nascom Documentation Library - PolyDos Users Guide

1. Introduction to PolyDos

```
1.1 The manual
       1.2 Notations
2. General System Information
       2.1 PolyDos memory organisation
       2.2 Disk formats
              2.2.1 Single density format
              2.2.2 Double density format
       2.3 Replacing disks
       2.4 TAB characters
       2.5 The BREAK function
3. PolyDos disk drives
       3.1 File specifiers
              3.1.1 File names
              3.1.2 File extensions
              3.1.3 Drive numbers
       3.2 File attributes
       3.3 Family file specifiers
4. PolyDos operation
       4.1 Power-up
       4.2 Command lines
              4.2.1 Command options
              4.2.2 NAS-SYS commands
       4.3 PolyDos commands
              4.3.1 DIR
                                   - List directory
              4.3.2 COPY
                                   Copy files
              4.3.3 REN
                                   – Rename files
              4.3.4 DEL
                                   - Delete files
              4.3.5 UNDEL
                                   - Undelete file
              4.3.6 LOCK

    Lock files

              4.3.7 UNLOCK

    Unlock files

              4.3.8 PACK
                                   - Pack disk
              4.3.9 SAVE

    Save file

              4.3.10 LOAD
                                   - Load file
                                   - Change file attributes
              <u>4.3.11 ATTRIB</u>
              4.3.12 LIST

    List file

              4.3.13 SKIP
                                   - Print blank lines
              4.3.14 BUFFER
                                   - Define RAM buffer
              4.3.15 NAME
                                   - Rename disk
```

4.3.16 READ

- Read sectors

<u>4.3.17 WRITE</u> - Write sectors <u>4.3.18 NEW</u> - New disk(s) inserted

<u>4.3.19 BOOT</u> - Reboot PolyDos

4.4 Special commands

4.4.1 EDIT - Invoke PolyEdit4.4.2 BASIC - Invoke Disk Basic

4.5 Executing files

4.5.1 Standard file types

4.5.1.1 Machine code program files

4.5.1.2 Text files

4.5.2 User defined file types

5. The boot process

5.1 Creating a turn-key system

6. The system files

7. Error messages
